In the case of Banking Societies running stores sections fees will be calculated at the rates applicable to Pure Banking Societies on the Working Capital *plus* on turnover at the rate applicable to other societies.

The audit fees is fixed on the basis of working capital and net profits in the case of pure credit societies and on the basis of turnover (sales) and profits in the case of sales societies.

(c) The reaction of some of the Urban Co-operative Societies is a feeling that the scale fixed by Government is rather high. The order, has however no adverse effects on the working of the societies. Typical cases indicating the fees charged as per new and old orders are placed on the table to show the effect of the new order.
